

ZIMBABWE EZEKIEL GUTI UNIVERSITY

FACULTY OF BUSINESS, ECONOMICS AND ACCOUNTING

DEPARTMENT OF BUSINESS ADMINISTRATION AND MANAGEMENT

EXAMINATION PAPER

COURSE CODE : CBM202
COURSE TITLE : BUSINESS RESEARCH METHODS
SPECIAL REQUIREMENTS : **FORMULA BOOKLETS; TABLES; CALCULATOR**
DURATION : 3 Hours
LEVEL : 2.219 AUG 2021
DATE : 1901 BARRASSIE RD. BINDURA
P. O. BOX 300 BINDURA
Email: exam@zegu.ac.zw

ZIMBABWE EZEKIEL GUTI UNIVERSITY

Email: exam@zegu.ac.zw

ZIMBABWE EZEKIEL GUTI UNIVERSITY
EXAMINATIONS OFFICE
19 AUG 2021
1901 BARRASSIE RD. BINDURA
P. O. BOX 300 BINDURA
Email: exam@zegu.ac.zw

INSTRUCTIONS TO CANDIDATES:

1. No cell phones are allowed in the examination venue.
2. Answer **two** questions from **Section A** and any other **two** questions from **Section B**
3. Begin each question on a new page.
4. The number of marks allocated to each question or part question is shown in brackets
5. All questions carry twenty five marks
6. The number of marks for each question or part question is shown in brackets []

SECTION A

Answer any two questions from this section

Question 1

- a) With the aid of examples define the following terms:
- i) Business research (3 marks)
 - ii) Construct validity (3 marks)
 - iii) Plagiarism (3 marks)
 - iv) Theoretical framework (3 marks)
 - v) Problem statement (3 marks)
- b) Making use of the Harvard referencing style, demonstrate how you can reference a journal article both 'in text' and in the 'reference list'. (10 marks)

(Total 25 marks)

Question 2

Positivism fits the reality of business phenomena better than interpretivism. Making use of examples, examine this proposition (25 marks)

(Total 25 marks)

Question 3

- a) Making use of examples compare and contrast research questions and research hypotheses. (10 marks)
- b) 'Quantitative research studies are better than qualitative ones in the realm of business management. Evaluate this proposition in light of business examples. (15 marks)

(Total 25 marks)

SECTION B

Answer any two questions from this section

Question 4

- a) Making use of business research examples, outline the main characteristics of a normal distribution (10 marks)
- b) Making use of examples distinguish between the following:
- i) Standard normal distributing and non-standard normal distribution (5marks)
 - ii) Pearson's product moment correlation coefficient and Spearman's rank order correlation coefficient. (5 marks)
 - iii) Parameter and Statistic (5 marks)

(Total 25 marks)

Question 5

a) The weekly sales returns for a newly launched beverage follow a normal distribution with mean 400 and variance 10000.

Calculate the probability that on a specific week:

- i) More than 450 units will returned (3 marks)
- ii) Less than 300 units will returned (3 marks)
- iii) The sales returns will range between 350 and 500 lie between (4 marks)
- iv) Briefly comment on the relevance of the normal distribution in business research (2 marks)

b) Due to Covid19 pandemic, a certain business person with four retail outlets in different business centres started to realise a decline in overall sales. He decided to figure out if the sales are declining similarly in all the outlets. As a primary step he collected data using sales of four different products across all the retail outlets and tabulated the data as follows:

		<i>Business centers</i>			
		Glendale	Mazowe	Shamva	Bindura
Product Categories	Lobels bread	29	25	20	18
	Sugar 2kg	14	15	10	11
	Cremora	30	24	16	11
	Geisha soap	8	10	4	5

Test at 5% level of significance if there is a significant difference in the sales realised at the four mentioned business centres. (15 marks)

(Total 25 marks)

Question 6

a) A certain business person wanted to assess the relationship between opening hours and daily sales. Data collection was done for ten consecutive days and tabulated as follows:

Day	1	2	3	4	5	6	7	8	9	10
Opening Hours	10	6	7	8	9	5	4	10	11	12
Sales (units)	30	20	22	25	28	16	15	29	32	36

Using the data above:

- i) Calculate the Spearman's rank correlation coefficient (8 marks)
- ii) Comment on your answer advising the business person (2 marks)

- b) A certain business person owning several retail outlets wanted to test the relationship between an employee's performance and gender. Collected data was tabulated as follows:

		<i>Gender</i>	
		Male	Female
<i>Speed</i>	Fast	36	15
	Slow	19	10

Test at 5% level of significance if there is an association between gender and employee speed. (15 marks)

(Total 25 marks)

FACULTY OF BUSINESS ECONOMICS AND ACCOUNTING

STATISTICAL FORMULAE

Sample Variance: $s^2 = \frac{\sum(x-\bar{x})^2}{n-1}$

Sample Standard Deviation: $s = \sqrt{\frac{\sum(x-\bar{x})^2}{n-1}}$

Product moment correlation coefficient:

$$r_{xy} = \frac{n \sum xy - \sum x \sum y}{\sqrt{[n \sum x^2 - (\sum x)^2][n \sum y^2 - (\sum y)^2]}}$$

Spearman's rank order correlation coefficient: $r_{ho} = 1 - \frac{6 \sum d^2}{n(n^2-1)}$

Chi-squared Test Statistic: $\chi^2 = \sum \frac{(O-E)^2}{E}$

Z-score: $z = \frac{x-\bar{x}}{s}$

Standardisation: $Z = \frac{x-\mu}{\sigma}$ Where $Z \sim N(0,1)$

T-score: $T = 50 + 10\left(\frac{x-\bar{x}}{s}\right)$

Student t-test: $t = \frac{\sqrt{(n-1)} \cdot \sum d}{\sqrt{n \sum d^2 - (\sum d)^2}}$

Total Sum of Squares $TSS = \sum x_{ij}^2 - \frac{G^2}{N}$

Group Sum of Squares $GSS = \sum \frac{r^2}{n} - \frac{G^2}{N}$

Block Sum of Squares $BSS = \sum \frac{B^2}{b} - \frac{G^2}{N}$

Residual Sum of Squares: One-way $RSS = TSS - GSS$

Residual Sum of Squares: Two-way $RSS = TSS - (GSS + BSS)$

Area under the Normal Curve P(Z≤z) From -3.49 to 3.62
